

Our Stance

We would like to state that our project land is not part of any recent zone change. It is and was part of settlement zoning done a last few decades.

We would also like to state that as a responsible and reputed developer, we remain fully committed to upholding the highest standards of compliance with all statutory approvals and legal processes. Our ongoing development is being carried out in accordance with the requisite permissions.

We deeply value the unique cultural heritage, economic aspirations, and environmental balance that define Goa. Our project has been thoughtfully designed to integrate with and contribute to these values. From sustainable construction practices to community engagement initiatives, we are dedicated to ensuring that the development aligns with the long-term vision for Goa's growth—without compromising its ecological fabric or cultural soul.

You will be happy to note that the construction is progressing at a steady pace, and we remain on track to deliver within the promised timelines, backed by the trusted quality that our brand stands for.

We take this opportunity to reaffirm our commitment to our stakeholders, to the state of Goa, and to responsible development that respects both people and place.
